

# PLANTERS' RECORD

VOL. XXVI

A quarterly paper devoted to the sugar interests of Hawaii,  
and issued by the Experiment Station for circulation among  
the plantations of the Hawaiian Sugar Planters' Association.

JANUARY

TO

DECEMBER

# The Hawaiian Planters' Record

VOL. XXVI.

1922

# HAWAIIAN SUGAR PLANTERS' ASSOCIATION

## OFFICERS FOR 1922

J. W. WALDRON	.....	President
J. M. DOWSETT	.....	Vice-President
J. K. BUTLER	.....	Secretary
G. G. KINNEY	.....	Treasurer
E. F. BISHOP	.....	Auditor

## TRUSTEES FOR 1922

E. F. BISHOP	W. O. SMITH
A. W. T. BOTTOMLEY	E. D. TENNEY
J. M. DOWSETT	J. W. WALDRON
JOHN HIND	JOHN WATERHOUSE
E. H. WODEHOUSE	

## EXPERIMENT STATION COMMITTEE

C. R. HEMENWAY, Chairman	
HORACE JOHNSON	WM. SEARBY
T. H. PETRIE	J. N. S. WILLIAMS
D. A. MEEK, Secretary	

## EXPERIMENT STATION STAFF

H. P. AGEE	.....	Director
R. C. L. PERKINS	.....	Consulting Entomologist
OTTO H. SWEZEY	.....	Entomologist
F. MUIR	.....	Entomologist
H. T. OSBORN	.....	Assistant Entomologist
P. H. TIMBERLAKE	.....	Assistant Entomologist
F. X. WILLIAMS	.....	Assistant Entomologist
C. E. PEMBERTON	.....	Assistant Entomologist
H. L. LYON	.....	Botany and Forestry, in charge
L. O. KUNKEL	.....	Associate Pathologist
E. L. CAUM	.....	Assistant Pathologist
GEO. A. McELDOWNEY	.....	Forest Supervisor, Oahu Project
L. W. BRYAN	.....	Forest Supervisor, Hilo Project
R. E. DOTY	.....	Asso. in Pineapple Investigations
H. L. DENISON	.....	Asst. in Pineapple Investigations
W. A. WENDT	.....	Asst. in Pineapple Investigations
W. R. McALLEP	.....	Sugar Technologist
W. L. McCLEERY	.....	Asst. Sugar Technologist
A. BRODIE	.....	Technical Chemist
H. F. BOMONTI	.....	Assistant Chemist
H. A. COOK	.....	Assistant Chemist
GUY R. STEWART	.....	Chemist
W. T. McGEORGE	.....	Associate Chemist
F. R. WERTHMUELLER	.....	Assistant Chemist
E. C. THOMAS	.....	Assistant Chemist
FRED HANSSON	.....	Assistant Chemist
J. A. VERRET	.....	Agriculturist
Y. KUTSUNAI	.....	Assistant Agriculturist
W. W. G. MOIR	.....	Assistant Agriculturist
F. A. PARIS	.....	Assistant Agriculturist
H. K. STENDER	.....	Assistant Agriculturist
W. C. JENNINGS	.....	Assistant Agriculturist
O. C. MARKWELL	.....	Assistant Agriculturist
D. A. MEEK	.....	Chief Clerk

# TABLE OF CONTENTS TO VOLUME XXVI

	Page
High Yield Possibilities .....	1
Promising H 109 Seedlings.....	2
Wireworm Damage in Hamakua.....	6
Phosphates in Hawaiian Soils.....	11
Collapsed Boiler Tubes .....	27
The Origin of New Canes by Bud Variation.....	28
The Sugar Industry in Java.....	32
Annual Synopsis of Mill Data, 1921.....	39
Sugar Prices .....	53
"The Record"—A Quarterly .....	55
Topping Cane for the Mill.....	55
New Acreage Census of Cane Varieties.....	56
Studies in Clarification .....	56
Insect Transmission of Yellow Stripe Disease.....	58
Direct and Indirect Injury to Plants by Insects.....	65
Field Methods Used at Waipio.....	67
Irrigation at the Waipio Substation.....	70
Value of the Upper Joints of Cane.....	71
Bud Selection and Increased Yields.....	75
Fig Trees for Hawaiian Forests.....	78
Orientation of Cane Rows.....	88
First Season Tasseling a Possible Benefit.....	90
Boiling House Recoveries by the Ash Sucrose Formula.....	92
Buffer Action of Phosphoric Acid in Hawaiian Soils.....	94
Notes on Some Enemies of Nut Grass.....	95
Varieties at Honokaa .....	97
Has Uba Cane Commercial Possibilities in Hawaii?.....	99
Liming Cane Juices and Its Effect on Unknown Losses.....	103
Combatting the Field Rat.....	109
Fiji Disease in the Philippines.....	117
Fertilizer Practices .....	118
The Human Element in Power Plants.....	119
The Aeroplane in Agriculture and Forestry.....	120
Clarification .....	122
Sugar Prices .....	140
The Growth of the Sugar Cane Plant.....	141
Sugar Yield of Hawaii for Crop of 1921.....	145
Mites in Their Possible Relation to Root-rot in Hawaii.....	145
Fig Trees for Hawaiian Forests.....	148
Earthworms and Their Culture in Relation to Agriculture.....	159
Mosaic Disease on a New Grass Host.....	163
Experiments at Oahu Sugar Company.....	164
Entomological Work in the Philippines.....	173
The Improvement of Pineapples Through Bud Selection.....	178
The Absorption and Interaction of Fertilizer Salts and Hawaiian Soils..	186
Recovery of Sugar From Last Mill Juice.....	196

Nitrogen Increases Yield at Grove Farm.....	205
Juice Extraction by Centrifugal Force.....	211
Why Do Rats Eat Cane?.....	213
Plows vs. Hoes .....	216
Cultivation Practices .....	218
Preliminary Investigations in Seed Germination.....	219
Experiments at Maui Agricultural Company.....	223
The Soil Solution by Displacement.....	234
Nitrogen Gives Results at Lihue.....	241
Phosphate Experiment at Lihue.....	245
Plant Food Experiment at Lihue.....	247
Something About Separators.....	249
Studies in Indian Sugar Canes.....	252
Sugar Prices .....	267
Intensifying Agriculture .....	269
Sugar: 15.36 Tons per Acre on 288 Acres.....	271
Potash in the Hilo District.....	276
Flume System of Irrigating Sugar Cane .....	281
Liming .....	293
The Maui Progenies .....	296
D 1135 and Yellow Tip at Honokaa .....	309
Field Distribution Record of H 109 .....	310
Phosphoric Acid and Potash in Hamakua .....	312
Phosphoric Acid in Cane Juices .....	317
Badila and Yellow Tip at Kilauea.....	322
Results From the Introduction to Fiji of Parasitic Insects.....	324
A Paper Laying Machine.....	326
The Analysis of Ash in Cane Sugar and Molasses.....	327
Liming Acid Lands .....	333
Mauka Soils Respond to Phosphates.....	336
Nitrogen at Grove Farm .....	338
Notes on Foreign Cane Diseases.....	339
"H 400" Seedlings at Waipio .....	343
Early Experiments With One-Eye Cuttings .....	345
Lap Joints Unsuitable for Return-Tubular Boilers.....	346
Phosphoric Acid at Kilauea.....	348
No Response From Potash.....	351
Studies in Indian Sugar Canes.....	353
Sugar Prices .....	364

ILLUSTRATIONS APPEARING ON THE COVERS OF  
VOLUME XXVI.

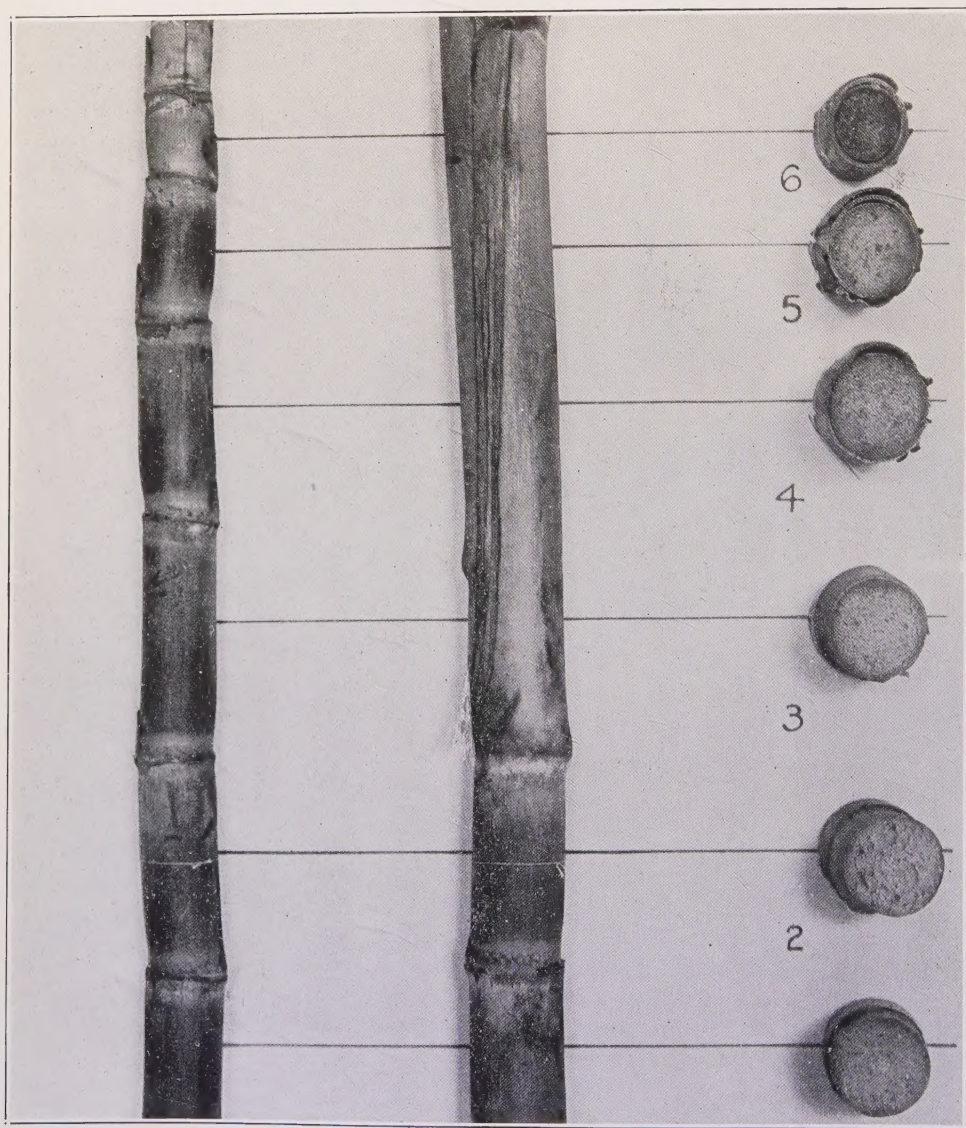

No. 1.

A section of a seventeen-acre field which produced 15.83 tons of sugar per acre from the plant crop. The ratoons, shown here, are being watched with interest to see if the high yield of the plant cane can be repeated.

No. 2.

Where do you top your cane in cutting it for the mill?

No. 3.

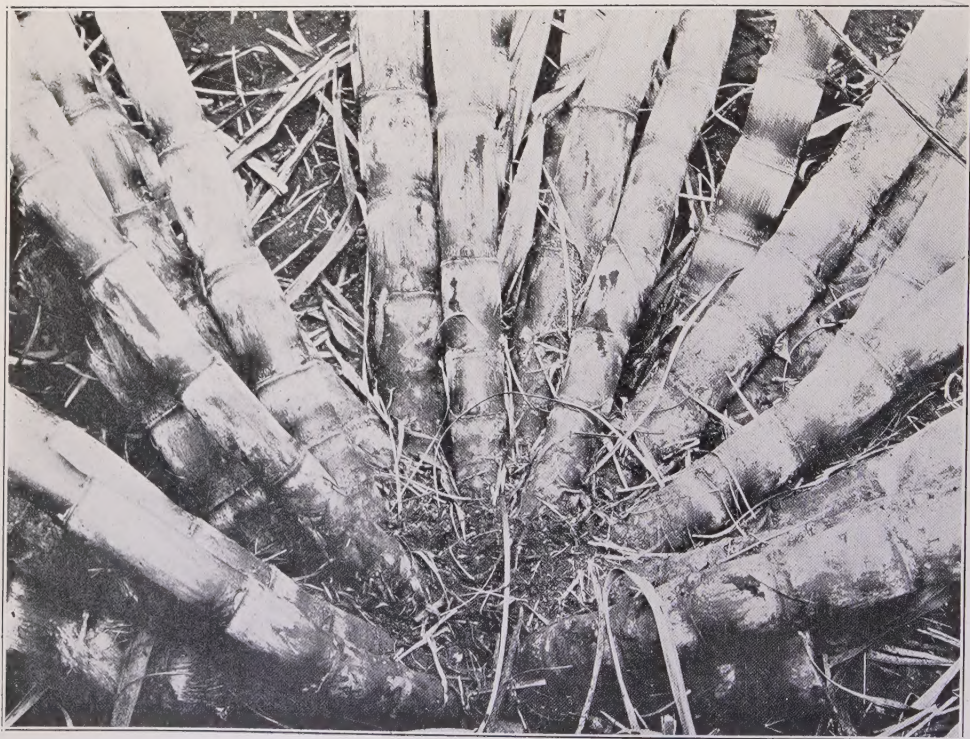

A tree which presents possibilities in reforestation work. This specimen of *Ficus elastica* grows at Koloa; the old stone mill rollers at its base are relics of the early history of the industry.

No. 4.

A prize stool of H 109.
